## **THE PRESRV™ GUIDE TO WINE STORAGE**

From a crisp, cool rosé tucked into a picnic basket on a sunny day to a long treasured, flawlessly aged and decanted Napa Cab at a Very Important Dinner Party, wine is a part of your life—a really good part. And because of that, you want it to be right, no matter who you're serving it to or what the occasion is. You've carefully purchased every bottle you own, but that's just the beginning. You need to make sure your wine is protected from the elements until you're ready to drink it—and that it's at the ideal temperature when you do. (Obviously using a Presrv™ cooler is step number one!) What follows is a guide to making sure each wine you drink is perfect—from picnic to party and beyond.

### **SO COOL**

Regulating the temperature of wine is important. Even minor fluctuations in temperature can affect flavor profiles and the ability to age. A temperature-stable storage environment is key to having confidence in every bottle you open. PreciseTemp™ and Active Cooling Technology provide temperature stability and even cooling to maintain that perfect temperature.

### **SOMETHING'S FISHY**

As much as you love keeping salami, smoked salmon and gorgonzola in your fridge for those impromptu, let's-open-one-more-bottle nights—your wine does not want to be stored alongside your robustly scented snack foods.

### **STEADY AS SHE GOES**

Disruptions in the aging process such as vibrations can affect flavors and rapidly spoil or flatten the taste. Wine needs to rest in a still environment until it's opened. The Vibration Dampening System ensures noise and vibration are reduced to minimize wine disturbance.

### **LIGHTS OUT**

A brightly lit environment will damage wine over time, resulting in cloudiness and unappealing odors. Sunlight, fluorescent light, and UV light are all equally detrimental to your precious bottles—so even though you'd love to show off your newest acquisitions, please don't display your wines on the kitchen counter. All Presrv™ Wine & Beverage Coolers include dual-pane, argon-filled glass, which improves insulation to minimize heat exchange and increases soundproofing characteristics. The Low-e coating helps minimize the amount of UV and infrared light that passes through the glass door.

## BEVERAGE COOLER MODELS

SINGLE ZONE BEVERAGE COOLER  
**PRB15C01BG**  
15" Compact / Built-in / Freestanding  
Stainless Steel + Glass Door

**FEATURES**  
Capacity: 4 bottles (750 ml), 64 12oz cans  
34° - 50°F  
39 dBA  
33-7/8" - 34-7/8" height range  
Zero-clearance door hinge  
Electronic capacitive touch controls  
1 full-extension, black wood rack with stainless steel trim  
2 adjustable, transparent-gray glass shelves with airflow openings  
Sabbath mode

SINGLE ZONE BEVERAGE COOLER  
**PRB24C01BG**  
24" Compact / Built-in / Freestanding  
Stainless Steel + Glass Door

**FEATURES**  
Capacity: 7 bottles (750 ml), 112 12oz cans  
34° - 50°F  
39 dBA  
33-7/8" - 34-1/2" height range  
Electronic capacitive touch controls  
1 full-extension, black wood rack with stainless steel trim  
2 adjustable, transparent-gray glass shelves with airflow openings  
Easily stores large diameter bottles  
Sabbath mode

PANEL READY SINGLE ZONE BEVERAGE COOLER  
**PRB24C01BPG**  
24" Compact / Built-in / Freestanding  
Panel-Ready\* + Glass Door
