# ZEPHYR

## ENTERTAIN THIS FALL IN STYLE WITH NEW ZEPHYR PRESRV™ WINE & BEVERAGE COOLERS

WHERE PROFESSIONAL STYLE MEETS MODERN LUXURY

Presrv Full Size Dual Zone Wine & Beverage Cooler is the ultimate combination of wine and beverage cooling with two distinct temperature zones.

over time. The best feature is the size: Each unit holds over 50 750-milliliter wine bottles, 112 12-ounce bottles and 49 12-ounce cans. Full-Extension Wood Racks, Slide-Out Gray Shelves and a full-extension stainless steel rollout bin make it easy for guests to easily select their preferred beverage.

Zephyr also offers Presrv™ Pro Wine & Beverage Coolers that complement any professional-grade appliances. The impressive Pro Single Zone Beverage Cooler fits flawlessly inside any cabinet system and holds up to seven wine bottles or 112 12-ounce cans, and it features a retractable quarter-shelf that is ideal for taller bottles and a full-extension black wood rack that is perfect for chilling white wine. The Presrv Pro Beverage Cooler is ENERGY STAR® Certified and is the coldest on the market, with a temperature range that dips down to 34 degrees Fahrenheit.

Shop the full collection of Presrv™ Wine & Beverage Coolers at [zephyronline.com](http://zephyronline.com).

**W**ith the arrival of fall comes more dinner parties, holiday gatherings and time with the family. From preparing the latest recipes to stocking the fridge with a variety of beverages, the key to successful entertaining is being prepared to meet every guest's needs. Be equipped this season with the Zephyr Presrv™ Full-Size Dual Zone Wine & Beverage Coolers or Pro Wine & Beverage Coolers, which offer high-quality cooling with maximum style and storage.

Known for creating innovative kitchen solutions that make everyday living easier, Zephyr sought to create the ultimate refrigeration product for efficient entertaining. The Presrv™ Full-Size Dual Zone Wine & Beverage Cooler is one of the only solutions on the market in this size that offers two distinct temperature zones for cooling wine as well as beverages. This frees up space in the main refrigerator, and ensures cold beverages are always on hand. The exclusive PreciseTemp™ temperature control and Active Cooling Technology keep both the top and bottom zones at the perfect temperature range (38° to 65° F), and a Vibration Dampening System keeps wine bottles still to preserve flavor and development

Presrv Pro Coolers are designed with a wider frame, pro-style handle, and integrated lock.
